B.C.

Mrs. J. McPhee and two daughters  
Elda and Wilena have returned home to  
Westminster after a holiday here.

Miss Helen Olsen of New West-  
minster is visiting her home here.

#### ABBOTSFORD

Mrs. J. Gilmore entertained at a  
jolly house party on Wednesday evening  
in honor of Miss Betty West and  
her friend Miss Kathleen Wallace of  
Vancouver.

Mr. and Mrs. D. Emery have moved  
from Mr. McDaniel's house to Mrs.  
Spaulding's house near the garage.

Mr. Chas. Sumner leaves today for  
Prince George, where he has secured a  
position.

Mr. and Mrs. Bock of Alberta and  
Mr. and Mrs. McLeod of Vancouver  
were week-end guests of Mrs. D. Emery.

Miss M. Smith is holidaying at the  
Coast.

Miss Reid of Edinburgh is a guest of  
Mrs. Blackie.

Mr. A. A. Weston of St. Nicholas is  
receiving treatment in St. Paul's hos-  
pital, Vancouver.

Henry J. Theuner and Guy Polson of  
San Diego called upon friends at the  
Mill this week, and were shown around  
the district.

## Professor Laird's Third Cross-Canada Tour

Upper left—Exploring the  
Rockies on Mountain Ponies

Upper right—Wheat Fields  
of Western Canada

Lower left—Empress Hotel,  
Victoria, B.C., one of the  
show places of the Pacific  
Coast to be visited by the  
Travellers.

Lower right—Famous Sul-  
phur Pool at Banff.

Professor Sinclair Laird, Dean of the School for Teachers, Macdonald College, makes his third annual tour "Across Canada and Back" with a party of Easterners leaving Toronto by Canadian Pacific Railway on July 19. Professor Laird's remarkable success with the two previous tours evoked such large demands for another of these "nonpareil" trips to the land of majestic peaks and purple mists that the third tour becomes a necessity, a national requirement.

A personal acquaintance with Canada's provinces is considered essential for every Canadian's education nowadays. Travel is a sound investment which not only maintains its value throughout life but adds continually to daily pleasure and efficiency. Nothing can take the place of the personal experience that comes through travel, leading educationalists the world over agree. In the realm of Canadian literature, history and geography, reading and teaching may be enhanced and brightened by personal familiarity after the subjects have been seen and admired.

Long after the trip has been completed there will remain in the hearts of those who have made the journey the imprint of quiet valleys, wooded forests, and nature's dignified solitude. As Edith Johnson sang of the Rocky Mountains:

Farther than vision ranges,

Farther than eagles fly,

Stretches the land of beauty,

Arches the perfect sky,

Hemmed through the purple mists afar

By peaks that gleam like star on star.

The trip to the West covers the Muskoka district, and the world-famous mining region of Sudbury, Lake Superior is then skirted as far as Fort William, and thence to Winnipeg with a side trip to Winnipeg Beach, the Manitoban summer resort, and on to Indian Head, Regina, Moose Jaw and Calgary where the Canadian Pacific Rockies are entered

through the Gap, two almost vertical walls of dizzy height, streaked and capped with snow and ice. Here we come to Banff, headquarters of the Rocky Mountains Park, a wonderful region of 2,751 square miles embracing rivers, lakes and noble mountain ranges!

From Banff to Windermere, 104 miles, the party under Professor Laird will go by automobile. Then from Windermere to Kootenay, through beautiful Kootenay Lake to Nelson. Leaving Nelson they pass through the Doukhobor country to Penticton, skirt Okanagan Lake, cross Fraser River at Hope and proceed to Vancouver. After two days at Vancouver the party sails to Victoria, affording an opportunity of seeing the famous Crystal Gardens.

Travelling back to the East the trip takes in the Fraser and Thompson River Canyons, and in especial the marvellous Lake Louise district. At the latter may be seen the white smoke of avalanches that go thundering down from the glacier four miles away. Lake Louise is about a mile and a quarter long and nearly half a mile wide. The Indians say its waters are distilled from peacocks' tails and paved with mother-of-pearl, and into them pour those wild blue waters whose colors are mixed on the palette of the glaciers.

On the journey back East the trip is varied by calls at Edmonton and Saskatoon, while the awe-inspiring Devil's Gap near Kenora is also taken in. A full day is spent at each of these places. From Fort-William the party embarks on a Canadian Pacific steamboat on which they traverse Lakes Superior and Huron to Port McNicoll whence a short trip to Toronto ends the journey.

While the trip is under the leadership of Professor Sinclair Laird it is by no means confined to travellers who belong to the teaching profession, and in former years a large proportion has been composed of people drawn from industrial, business and municipal circles who desire to increase in this pleasant and unique manner their acquaintance with the facts of their own country.

#### Matsqui Fair List Out

Matsqui fair prize lists have been printed and are now in the mails. The list comprises more pages than last year, and outlines the program of events, classes and prizes most comprehensively. Five hundred copies are issued. Those not receiving copies in the mails may obtain one from Dr. Woods, Matsqui; Chas. Christianson, Gifford, or the News office.

P. Curry has purchased a lot in White Rock from A. R. Gosling.

Lilas Longfellow of Tacoma is the guest of Mrs. W. Little.

Mrs. A. Thompson is visiting friends in Vancouver.

Miss Marian Norris of Vancouver is guest of Miss Elsie McPhee.

At a meeting of Huntingdon Women's Conservative association held recently at the home of Mrs. Purver, Mrs. Davis was named as delegate to attend the forthcoming convention.

#### FIRE THREATENS LAST STAND OF LOCAL LOGGING COMPANY

Fire started in a logged-off section about three miles south-west of Abbotsford on Tuesday, and after burning over approximately 100 acres is under partial control as we go to press. The blaze threatens the remaining stand of timber owned by the A. L. M. & D. Co. and also adjoining farmsteads, including that of Mrs. Caldwell. One side of the logging company's equipment, of the value of \$30,000, is also in danger of destruction. At present back-firing is in progress by crews under direction of fire-wardens Vanetta and McInnis.

Mrs. Dunham has had as her guests her daughter and son-in-law Mr. and Mrs. Canvanagh, accompanied by Mr. and Mrs. Canvanagh of Calgary. The party motored here and report a most interesting trip.

About 100 north and south bound autos are cleared daily at the South Aldergrove port.

Mr. and Mrs. King of Huntingdon were tendered a presentation by residents at the home of Mrs. Tapp on Tuesday of last week. Mr. King has been compelled because of sickness to resign the principalship of Huntingdon school, and is returning to Vancouver to reside. Rev. T. S. Paton, Mr. W. Owen, Mrs. Tapp and others spoke of the excellent work done in the church and community by Mr. and Mrs. King.

Mrs. Higginson of Poplar is a patient in the M. S. A. hospital.

Mrs. J. Ker and son Peter are camping at White Rock.

#### FULL GOSPEL MISSION SERVICES

Tuesday and Friday at 7.30 p.m.  
Sunday at 11 a.m. and 7.30 p.m.  
Sunday School at 10 a.m.

#### WHATCOM ROAD

Sunday Service at 3 p.m.  
Sunday School at 2 p.m.  
Everybody Welcome  
J. C. MacKenzie, Pastor

#### Struck By Truck; Loses Front Wheel

A Chevrolet car minus one front wheel was towed into town by Weir's crane on Tuesday. The driver of the car, a representative of the McClary Mfg. Co. reported that his machine was struck while traveling over Vedder Mountain road, by a Vancouver Province truck. He had turned out until two of his wheels were off the road, to enable the truck pass, he said.

Regular week-end rates will apply on the B.C.E.R. during Vancouver Exhibition week, August 4 to August 14.

S. Mussallem has relinquished ownership of his garage business in Mission known as Mission Motors, which is now being carried on by Mr. Griffiths. Mr. Mussallem is personally managing his branches at Haney and Hammond.

S. A. Cawley, Chiliwack, has been appointed returning officer for the Fraser Valley.

Mrs. McClenahan has returned from a visit to Seattle and has as her guests her son and daughter-in-law Mr. and Mrs. Ellis McClenahan of Seattle.

## WORLD HAPPENINGS BRIEFLY TOLD

A government decree is to be issued in Spain shortly fixing a minimum wage scale and maximum hours of work for maid and man servants.

The House of Commons gave third reading to a senate bill amending the Canada Evidence Act as respects bank books and records.

Most of the contents of Queen Alexandra's private rooms at Marlborough House have been distributed to charitable institutions in accordance with the late Queen's wish.

Dr. W. W. Yen, premier of the Peking Government which was formed on May 13, 1926, has resigned. Admiral Tu Hsi-Wei, minister of the navy, has been appointed premier pro tem.

A tablet in the town hall at Saint Nazaire, France, commemorating the landing of the first Canadian troops in the war, was unveiled by Philippe Roy, Canadian commissioner general in Paris.

To encourage the mechanical development of agriculture and to further the use of German agricultural machinery, a trade combination of 4,000 factories has been perfected in Germany.

Major D. R. MacLaren, with one passenger and a full allotment of equipment, attained an altitude of 10,000 feet in a Curtiss H.S. 20 type of flying boat at Vancouver. This is believed to be a Canadian record for this type of craft.

Farmers of the Clogher Valley of Ireland have registered complaint that installation of the first telephones in this district was interfering with their use of the telegraph, which has been their only means of rapid communication for many years.

Joseph L. (Ben) Hursell, 78, one of Steele's scouts in the '85 Rebellion, and for 27 years fur trader at Fort Fitzgerald, was buried at Saskatoon, June 20. In 1878 he journeyed from Winnipeg to the Rocky Mountains in a cart, and started ranching there.

A charge of fraud against Herr Jolly, professional faster of Berlin, after police had satisfied themselves that cigarettes made of chocolate were handed to him nightly by an accomplice while he was engaged in one of his public fasts.

Negotiations on the question of a new wage agreement will open between the Railway Association of Canada and the Brotherhood of Railroad Trainmen and the Order of Railway Conductors on July 15. The men will seek a ten per cent. increase in wages.

## Channel Swim This Year Is Improbable

Attempt Not Feasible Owing to Abnormal Weather Conditions

No swimmer—male or female—will be able to swim the English Channel this year, in the opinion of numerous French and English swimming experts and trainers.

Abnormal weather conditions, following a terrible winter on the oceans and an extremely tardy spring, will make it extremely perilous for a man to attempt the battle with the channel tides, and virtually impossible for a woman.

Before starting a recent trip across the channel, the writer asked a hard-faced old veteran of the crew if he thought a woman ever would be able to conquer the cold water, the tides and the waves that are a part of the channel's daily routine.

The boat, tied up at the dock, was bobbing up and down like one of those trick floor devices at Coney Island, and waves were breaking over the prow. With the exception of one or two celebrants who had reached a "don't care" condition on the train from London, the passengers were all violently ill, and the trip had not yet started.

"Swim 'er?" the old salt answered. "Tis a hard job for a man to ride 'er. Look at the way she's runnin' now. I'd call the bobbies if a girl of mine tried to swim 'er."

He said that only the greatest of luck ever had enabled a man to swim across, and that if needed more than luck to make it possible for a girl.

### Signs of Winter

"How do you know when winter is near?" asked the teacher.

"Please," answered little Harry at the bottom of the class, "it begins to get late earlier."

We hear that a genius has invented a chair that can be adjusted to a thousand different positions. It is designed for the small boy to sit in when he goes to church.

Women are naturally foolish; they are more afraid of mice than they are of men.

## To Represent Canada

W. A. Wilson Will Be Agricultural Representative For Canada In Britain

W. A. Wilson, agricultural product representative for Canada in the United Kingdom, has been appointed Canadian member on the official board organized to direct the marketing of empire produce in Great Britain. The membership of the board was made known coincident with the announcement that Lieut.-Col. L. C. Amery, secretary of state for the dominions, is to act as its chairman. Seven members will sit on the board as representatives of the British Isles while the dominions and colonies will have one member each.

Mr. Wilson has been connected with Canadian dairy production for many years. Attached to the dairy branch of the federal department of agriculture he organized creameries in the province of Saskatchewan when dairying in that province was in its infancy. He was for many years superintendent for Saskatchewan of the scheme for promotion of dairying under the Federal Government. He later helped organize the co-operative creameries in that province, and was for many years associated with the Saskatchewan Co-operative Creameries, Ltd.

Mr. Wilson was appointed three years ago to his present position.

## Opening Shop In Paris

Nations Belonging to League Plan to Exhibit Arts

The League of Nations is going to keep a shop in Paris.

Twenty-six important nations, members of the Geneva organization, have approved the scheme of International Institute of Intellectual Co-operation to take over the entire gallery of the historic Palais Royal in the centre of Paris and give each league member a shop window wherein to display photographs of its beauty spots, fine buildings, samples of its books and other material evidence of its culture and thought.

Thus will be established a permanent international culture exhibition which will further international intellectual co-operation, the aim of the institute.

## Women Members of League

Canadian Is Member Of Child Welfare Committee

The League of Nations brings together clever women, and among them is a Canadian, Miss Charlotte Whitton. She is chairman of the child's welfare committee, and also a member of the Canadian Women's Press Club. Another prominent woman connected with the league is British, Dame Rachel Crowdy. She concentrates on opium studies, protection of women, and child welfare.

### Noted Commissioner

The nomination of the Rt. Hon. L. P. Duff, judge of the Supreme Court of Canada, to be commissioner under the United Church of Canada Act, is announced in the Canada Gazette. Mr. Justice Duff has been selected as chairman of the commission provided for in the United Church of Canada Act to settle certain property disputes between the United Church and the continuing Presbyterian Church.

What a pity it is that people who worry over trifles haven't something worth while to worry them.

Reflecting the New Mode in Fabric and Design

The beauty of printed silks is of great attraction in the new models. Cut with round neck and fastening at the side front, this charming frock developed in printed silk, displays a long panel and tie belt of plain material. There are tucks at the shoulders, and double inverted plaits at the side seams flare out, emphasizing the silhouette of motion. The long full sleeves are gathered into little bands at the wrist. No. 1311 is for misses and small women, and is in sizes 16, 18 and 20 years, or (34, 36 and 38 inches bust only). Size 18 years (36 bust) requires 4 1/4 yards 39-inch material. Price 20 cents.

Every woman's desire is to achieve that smart different appearance which draws favorable comment from the observing public. The designs illustrated in our new Fashion Book are originated in the heart of the style centers and will help you to acquire that much desired air of individuality. Price of the book 10 cents the copy.

## Airship's World Flight

Proposal to Make a Non-Stop Flight Around the World in Dirigible

A vast airship is being partly constructed at the Zeppelin works at Friedrichshafen, with which it is proposed to make a non-stop flight round the world. She is designed to carry an immense load of fuel. Starting from the airship base at Seville, Spain, she will head out across the Atlantic, ascending until she is in a westerly air-stream. When Central America is reached the airship will seek suitable currents for her crossing of the Pacific, after which it will be the aim to manoeuvre into an air-stream from the east, and so regain the starting point in Spain.

Running her engines at moderate speed, so as to economize fuel, and profiting wherever possible by favoring winds, it is calculated that the non-stop world flight will be accomplished in about 22 days. If the airship now being built is to be German-owned, it should be noted that ever since the peace, German aircraft construction has been restricted by allied regulations, which seriously increase the difficulty of building an airship capable of such a flight. A conference is in progress in Paris for the abolition or modification of these restrictions.

## No Arctic Continent

Nothing But Watery Wastes and Ice Fields At North Pole

Open water at and around the neighborhood of the North Pole is the report of the crew of the Norge. A few days before Lieut.-Com. Byrd looked down upon the pole from his plane and saw nothing but ice and snow. In April, 1909, when Peary reached the top of the world he found soft ice there and chopped through it to take soundings. The Norge saw no land near the pole as it approached and glimpsed neither island nor continent between the pole and Point Barrow.

"The Arctic continent," believed by many to exist, evidently is nonexistent. Watery wastes, ice-sheathed, have dispelled the dream of aviation stations and radio picket posts for the weather bureaus of the nations on the top of the world. Ice fields eternal opening from time to time and giving glimpses of the polar seas seems definitely established. That much of the polar mystery has been dispelled, and with the vanishing of that mystery it is possible that the pole will lose much of the allurements it has held for generations.—New York Evening Post.

## A Boy Artist Of France

Youngest Exhibitor In Paris Salon Only Thirteen Years Old

The youngest painter with a picture in this year's Paris Salon is Tony Ricou, the thirteen-year-old son of M. Georges Ricou, director of the Opera Comique in Paris. Tony is still attending high school and does his painting on Sunday and Thursday, the days there is no school in France. He sent in two pictures and the National Society of Fine Arts accepted one, a still life, showing a bowl of fruit on a table.

New York has a unique new luncheon organization, the Styx Club, which has nine men members, who have a weekly luncheon, to which just one woman guest is invited.

|---|--|---|

## Aid For the Blind

Old Age Pension Bill Will Be Introduced At Next Session

Premier Mackenzie King told a delegation representing the Canadian Federation for the Blind, that the Old Age Pensions Bill, killed in the senate, would be re-introduced at the next session. He stated the government hoped to hold a conference with the provinces in the interval, and that after such a conference it would be in a stronger position when presenting its bill to the house. He promised the delegation he would see the claims of blind persons were considered when that conference took place and would regard it as a privilege to sponsor legislation for the benefit of the blind.

## Should Show Courtesy

American Tourists Fail to Display Canadian Flags On Cars

"The people of Canada desire to welcome motor tourists from the United States in the most cordial manner, but these visitors would greatly help to create a friendly atmosphere for themselves if they would show a sense of courtesy in displaying Canadian flags on their cars. They exact the most punctilious observance of this rule from visitors to their country, and they ought to be prompt to recognize the same amenity when they come to Canada. Courtesy in such things is a mark of good breeding as well as of international good will."—Brantford Examiner.

## To Protect Motorists

Urges Traffic-Stop Law At All Railway Crossings

In the interests of motorists themselves, a law requiring every driver of an automobile to stop his vehicle before crossing over a railway crossing should be passed and enforced in all the provinces, declared Gerald Ruel, legal vice-president of the Canadian National Railways, in addressing a meeting of the claim agents of that railway at Montreal. The meeting was representative of all regions of the system.

## Rhodes Lectureship Announced

The foundation of a new Rhodes memorial lectureship worth about £500 annually, was announced at the Rhodes dinner by Sir Otto Bell, trustee of the Rhodes trust. The object of the foundation is to bring to Oxford some man or woman of pre-eminent distinction from some other country, particularly the United States, so that special learning may be made available to the university.

### Safety First

He—"Would you say yes if I were to ask you to marry me?"

She—"Would you ask me if I would marry you if I said I would say yes if you asked me if I would marry you?"

There are times when economy may be more foolish than extravagance.

## Tourists See Mountains

Good Motor Roads Responsible For Influx of Visitors

Tourist traffic into Canadian Rocky Mountain resorts has been very heavy for the beginning of the season. The perfect condition of the Calgary-Banff highway, which was completed as a permanent highway by the provincial government last year, has been responsible for practically doubling the early season traffic into Banff and Lake Louise. The traffic into the Jasper National Park is also very heavy.

Summer in the Canadian Rockies has arrived three weeks earlier than anywhere in the Eastern United States and Canada, according to American visitors. It is the earliest Rocky Mountain summer in the recollection of the oldest white inhabitants of this district.

## New Turbine Engine Invented

Driven By Dynamos and Uses an Inexhaustible Fuel

A new principle turbine type engine which can propel a vehicle 500 miles at the cost of \$2 has been invented, claims F. J. Taylor, 21-year-old physics students of Toronto. Taylor says his invention is driven by dynamos and uses an inexhaustible fuel, the nature of which he refuses to divulge at present. It will develop ninety horsepower with only half the number of the ordinary motor's revolutions, he declares, and will also do away with the danger of carbon monoxide poisoning.

## A Tribute To Britain

Has Learned Problem of Just Dealing Says Rabbi

That was a fine tribute paid by Dr. Wise, Rabbi of the New York Free Synagogue, to Great Britain at the Kiwanis convention when he said: "There is not a nationality, a religion, a tongue, a race on earth representatives of which are not to be found within the British Commonwealth. As a student of life and history, I say to you that Great Britain has learned the problem of dealing justly with all its peoples and faiths and races and tongues as no other people have done up to this time."—Kingston Standard.

Nearly 2,000 animals have been destroyed in gas poisoning experiments carried out by the government at London since May, 1923.

Ex-Mayor Wm. Roberts, of Cardiff, Wales, who, accompanied by Mrs. Roberts, made a tour of Canada recently, as they appeared on the Cunarder Aurauka on the return journey to Liverpool.

(Continued)  
CHAPTER VIII.

**Joanna Makes a Decision**

After a time the girl, huddled on the floor in a heap of bobbed brown hair and clinging gown and silver stockings, still the birth of a new cob and stopped the convulsive tremble of her bare, velvet soft shoulders. Her eyes, as quick to dry as to dim with moisture, which is the way of youth, selected a spot on the parlor carpet, just beyond her toes, and fixed on it. So she sat very quiet, and stared, straightening out the jumble of her bitter, very bitter thoughts. She realized that she couldn't think sensibly for the things that had happened during the hectic day were not sensible things—any of them.

It was a trait of her's to rebel when things weren't right; she couldn't analyze, or probe for reasons, or ask herself if she were to blame. That is, she could ask if she were to blame when things got into a jumble, but her invariable answer was "No!" Time was when the spirit of Joanna was submissive and amenable to discipline, and to the learning of lessons out of experience. That was a long time ago—before she had to make her own way about and compete with other girls—with the ones who were on the square, as well as those who weren't. She gradually lost her sense of submissiveness then. Whoever criticized her, except herself, was wrong. As her tongue grew smarter, more and more accustomed to giving than it received; and her lips grew redder and more provocative, and her skirts became shorter, everybody—

Eren John! The one thing she admittedly loved. Even he could never understand a girl—a real, square and above-board girl who had to fight like the devil to keep up with the other girls of this day and age! John had objected to almost everything she did or wore or said. He'd preach by the hour. Once, in this same parlor—

## OPERATION LEFT HER VERY WEAK

Letter Tells of Wonderful Relief After Taking Lydia E. Pinkham's Vegetable Compound

Coniston, Ontario. "After a severe operation and a three weeks' stay in a hospital I returned home so weak that I was unable to move a chair. For four months I was almost frantic with pains and suffering until I thought sure there could not be any help for me. I had very severe pains in my left side and suffered agony every month. One day when I was not able to get up my mother begged me to try your medicine. My husband got me a bottle of Vegetable Compound at once and I took it. I started a second bottle, and to my surprise and joy the pains in my side left me completely and I am able to do all my work without help. I am a farmer's wife, so you see I can't be idle long. In all, I have taken six bottles of Lydia E. Pinkham's Vegetable Compound, five boxes of the Compound Tablets, two bottles of Lydia E. Pinkham's Blood Medicine, and have also used the Sanative Wash."—Mrs. L. LAURENSEN, Box 103, Coniston, Ontario.

## Manx Oath Is Extraordinary

Pledge Required Of Deemster of Isle of Man

The following is an extraordinary oath taken by the deemster of the Isle of Man, on entering office.

"By this Book, and by the Holy Contents thereof, and by the Wonderful works that God hath miraculously wrought in the Heaven above and in the Earth beneath, in six days and seven nights, I the person being sworn do swear that I will without respect, favor or friendship, love or gain, consanguinity or affinity, envy or malice, execute the laws of this Isle justly between our Sovereign Lord the King and his subjects within this Isle, and between party and party, as indifferently as the herring's backbone doth lie in the midst of the fish! So help me God and the Contents of this Book!"

This oath has been taken by many deemsters for a thousand years.

She'd given up, long ago, her struggles against the language of her young lady roomers. "Are you really sure, Jo," she asked, her words coming slowly, "that you haven't had, what you call a smash? All that money you had in your pocketbook, and you say there's more besides. You know—"

Before the steady gaze of the girl on the floor, the landlady faltered. The eyes that stared at her made her uncomfortable—uneasy with her doubts. "You see, Jo," she argued, plaintive in her self-justification, "the things a girl like you talks about, and knows about, and the places you go! George wears her clothes too tight and she says that's what girls are supposed to do nowadays. And you wear dresses that you ought to never cross your knees in—you oughtn't to sit down at all; it's worried me a lot. And you smoke, Jo, and I've heard you swear, too. That's why John was ready to believe—"

"You mean that's why you believe, too?"

"I won't believe, if you tell me it isn't so, Jo. I'll just believe in you and I'll take back the money you gave me." Suddenly the landlady was confused. "I'm sorry, Jo, but I put the five hundred dollars, and nobody knows what a God-send it would be to me, in the pocket of your old wrap. The coat's on your bed, now. If you say it came to you all right, like you say before, I'll take it, dear, and bless you for it!"

Joanna scrambled onto her feet, straightened her frock, brought a strap that had fallen back, onto her shoulder and, without a word, ran up the stairs to her room. When she reappeared she held the bill. She put it into Mrs. Adams' hand and folded the worn fingers about it. Neither she nor the landlady spoke. Mrs. Adams pulled the bobbed head down and kissed it.

"For once," Joanna remarked, when she straightened up, "I want a drink. I'm going to wait until George comes in, if she makes it early enough, and if her boy doesn't get the air too quick I'll buy them a taxi while we hunt an all-night bootlegger."

George arrived, early—one o'clock. Her companion of the evening was sufficiently equipped to supply Joanna's unaccustomed need, and glad of the excuse for lingering over his dismissal. Joanna's bitterness was mellowed, but far from banished, when a streak of gray, stealing across the court of sordid backyards, warned the two pyjama-clad girls propped up in Joanna's bed, that if they were to have any sleep at all against the excitements of the day to come they must get between the covers and trust to the household to awaken them. Many houses had been built, some of stone that were destined to stand forever, some cards that would be blown away.

(To be continued)

## World Wants Trained Minds

Most Important Positions Go To Those With University Training

The world makes merry with the sweet girl graduate, the blandly superior bachelor of arts, panoplied in rabbit skin, armed with a sheep skin, going out jauntily to conquer the world. But while the business man, the farmer, the workman may laugh at some of the fantastic tricks cut before high heaven by a few of the products of our institutions of learning who find it difficult to adjust themselves to a workaday world, the university graduate of today is respected and appreciated. The world recognizes the value of a trained mind, and has entrusted most of its important positions to men who have had the advantages of a university training.—Regina Leader.

She: "Oh, yes, everyone knows about it. Some take her part and some take his."

He: "And I suppose there are one or two eccentric people who are minding their own business?"

## She Could Never Do The Things Other Girls Did

Miss I. J. Ross, Scollard, Alta., writes:—"I am only twenty years old, but have suffered from heart palpitation and nerve trouble for several years. I could never do the things other girls did, that is, in the line of sports, skating, etc., and could never depend on myself at work. About six months ago I began taking

and am just twice the girl I was, and can enjoy everything in general life so much more. I am very grateful for what your Pills have done for me."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

## Good for All the Family

It makes them smile—it's sure worth while.

After every meal

## Explored Land Of Head Hunters

Scientist Secured Film Showing Process of Head Curing

Dr. Hert S. Dickey, well-known scientist, and his bride of a few months, the former Elizabeth Parker, have just finished an exploration trip that carried them through the land of the head hunters and the most remote parts of South America.

Dr. and Mrs. Dickey, with a staff of film experts, have reached Para, Brazil, completing a trip that began last November and carried them across the Andes Mountains on muleback. They obtained a full motion picture record of the process of reducing and curing human heads as practiced by the Jiveros of Eastern Ecuador. The Indians had just returned from one of their head hunting expeditions, which was found to be in retaliation for the kidnapping of their women by another tribe.

The party, which left Guayaquil, Ecuador, last November, crossed the Andes on muleback, encountering perpetual snow at an altitude of 14,000 feet within two degrees of the equator. They descended the eastern slope of the Andes into the dense jungle of Ecuador and then entered the country of the Jiveros. Thence they trekked 300 miles overland through the jungle to the head waters of the Napo River. Embarking in canoes the explorers paddled down the Napo to the Amazon River, whence they proceeded to Iquitos, Peru. A 2,000-mile paddle still awaited them in order to reach Para.

Dr. Dickey, while in the land of the head hunters, saved the life of an Indian bitten by a venomous snake, and as a reward was presented with a head cured while the explorers were in the territory. Head hunting, the explorers learned, is invariably in retaliation for the kidnapping of women by other tribes and causes all the wars in that district.

The skin of the victim's head is removed entirely and treated for ten days with tanbark and hot sand. The cured head measures about six inches in diameter. The features are well preserved, and the lips sewn to prevent the escape of evil spirits. The head hunters are not interested in the heads of white men.

Dr. Dickey, who is a fellow of the Royal Geographic Society, has spent 22 years in tropical South America and is well known as a geographer and explorer.

## The Prince's Doubles

Several Young Men Who Resemble Heir to British Throne

The Prince of Wales has other doubles than the young American who was recently in London, and whose resemblance to the Prince has caused several misunderstandings. A wealthy Parisian not long ago was almost compelled to leave Biarritz owing to his being mobbed by people who thought he was the Prince.

In South Africa there is a young man who is called "Teddy the Ninth" by his friends. This young farmer is the same height and build as the Prince, and even shares his famous smile.

## Has Unique System

A deaf man has been in the employ of the Galesburg, city water department for thirty years. He can tell the position of leaks in water mains by his teeth. He developed a system of placing a key or iron rod on a water main, and figuring the location of the leak by the vibrations felt through his teeth.

When a man makes a blunder that he can't blame on anybody else, he doesn't like to talk about it.

A fish diet may not strengthen the brain, but going fishing invigorates the imagination.

Minard's Liniment for Sore Feet

## Predicting Speedy Trans-Oceanic Flights

Hamburg to New York in 36 Hours Says Aerial Expert

The day when trans-oceanic flights between Hamburg and New York will be made in 36 hours is not far distant, in the opinion of Dr. Edmund Rumpler, noted German aerial expert. Dr. Rumpler has devoted the past five years to the preparation of plans for huge aircraft capable of carrying 136 passengers and seven tons of freight.

Plans which Dr. Rumpler has evolved for huge aircraft to make the trip call for planes propelled by ten motors of 1,000 horsepower each and capable of attaining a maximum speed of 175 miles an hour.

## Canada Will Extend Business

Government Voted \$375,000 For Commercial Intelligence This Year

The extension of Canada's commercial intelligence service was discussed in the House of Commons when a vote of \$375,000 for this service during the coming fiscal year was passed. Hon. J. A. Robb, acting minister of trade and commerce, assured the committee that everything would be done to extend business in France and elsewhere.

## SIXTEEN YEARS USE OF BABY'S OWN TABLETS

Has Shown One Mother There is Nothing to Equal Them

A constant use of Baby's Own Tablets for their children has proven to thousands of mothers that they are without an equal for babyhood and childhood ailments. One mother, Mrs. C. W. Jackson, R.R. 1, Gilford, Ont., writes:—"We have used Baby's Own Tablets ever since our first baby was born sixteen years ago. We have seven fine healthy children and the Tablets is the only medicine they received in their early years. Our baby is one and a half years old, is walking and talking and weighs 25 pounds. Baby's Own Tablets is the only medicine he has ever had."

Baby's Own Tablets are guaranteed to be absolutely safe for even the newborn babe. They are free from opiates and narcotics; act as a gentle laxative on the stomach and bowels and thus relieve constipation and indigestion; break up colds and simple fevers and make baby healthy and strong.

You can get Baby's Own Tablets from your druggist or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Little Helps For This Week

For the vision is yet for an appointed time, but at the end it shall speak, and not lie; though it tarry, wait for it; because it will surely come, it will not tarry.—Hab. II, 3.

Haste not! Rest Not! Calmly wait!

Meekly bear the storms of fate! Duty be thy polar guide! Do the right whate'er betide! Haste not! Rest not! Conflicts past, God shall crown thy work at last.

Johann Wolfgang von Goethe. "Doe the next thing." What a grand motto that was! And that was a good motto, "Repos ailleurs." Work here, rest is elsewhere; wipe thy tears; cease thy sighing; do thy work.—Frederic W. Farrar.

Unless worms be expelled from the system, no child can be healthy. Mother Graves' Worm Exterminator is an excellent medicine to destroy worms.

The Mrs.—"There was nothing shady or green about our family tree."

The Mr.—"As long as you speak of your family tree you might mention your bark, too."

A botanist in the Smithsonian Institution has collected 1,300 orchid specimens in Central America.

## England's King Never Dies

Heir Apparent Receives Title Immediately Sovereign Passes Away

The King of England "never dies." All that is admitted is a "demise of the Crown." The moment the Sovereign passes away, his titles, dignity and power are automatically transferred to the heir apparent, who from that moment reigns in his stead. So, too, just as the King never dies, he is always of full age directly he ascends the throne, whether he has reached his twenty-first birthday or not. In practice, however, a regent is appointed for administrative purposes during his childhood. A species of sanctuary attaches to all royal residences, and no kind of judicial process can be lawfully executed in one, except against a criminal or crown debtor. A royal residence is also exempt from rates and taxes so long as the Sovereign occupies it. Thus, Marlborough House is rated, but Buckingham Palace and Windsor Castle are not. On a "demise of the Crown" members of parliament, judges and naval and military officers are required to take a fresh Oath of Allegiance; and cabinet ministers surrender their portfolios.

## Restored To Original Meaning

Mapping Country From Aeroplane Is Really "Surveying"

The word "surveyor" has so long been applied almost exclusively to men engaged in running lines and performing other primitive duties of the civil engineer that it is rather amusing to see it restored to its original meaning of one who looks down upon a thing from above. The aeroplane has done it. Canada is mapping much of its hitherto uncharted country from flying machines. The photographs thus taken make, when pieced together, a continuous map that tells much more about the country than an ordinary map would show.—Youth's Companion.

Wretched from Asthma. Strength of body and vigor of mind are inevitably impaired by the visitations of asthma. Who can live under the cloud of recurring attacks and keep body and mind at their full efficiency? Dr. J. D. Kellogg's Asthma Remedy dissipates the cloud by removing the cause. It does relieve. It does restore the sufferer to normal bodily trim and mental happiness.

Tommy Hadn't Heard "Where is the Dead Sea?" asked the teacher of Tommy. "Don't know, ma'am," said Tommy. "Don't know where the Dead Sea is?" inquired the teacher. "No, ma'am," replied Tommy. "I didn't even know any of them were sick."

### PREPARING FOR HOP HARVEST AT SUMAS LAKE YARDS

If ordinary weather conditions prevail, within the next three weeks, one half of the hop vines in the Canadian Hop Company's yards at Sumas Lake will be ready for the pickers, according to H. M. Cook, engineer on the company's staff. A large acreage of the young vines have been treated with nitrate of soda, and these have since shown remarkable growth, and should ripen within the next two or three weeks. An interesting comparison is possible between the vines growing on the land treated with nitrate, and the soil which has not, indicating the value of this chemical to the lake bottom soil.

Under R. E. Brown a crew of carpenters are busy erecting the first hop kiln in readiness for the first crop. Several buildings have been constructed for the accommodation of pickers, and the effort of the Company is apparently to try to attract a desirable class of white help by providing clean and comfortable quarters. Conforming to the American custom the company is not disposed to employ any Indians or Orientals, but is willing to pay a higher rate to white pickers, and already have a number of families in this district arranged for. Boys and girls, Mr. Cook pointed out, are usually able to earn as much as adults, hop picking being very similar to berry picking.

Willows are now a declining worry to the hop men, although a tractor is kept busy yet on the yard margins. After being slashed last fall, some of these unwelcome shoots were found to have attained a height of 20 feet when attacked by the tractor batteries recently. Two 2-ton Holt Caterpillar tractors are attending to cultivation requirements in the local yards just now, and a few horses are used for trellis erecting and auxiliary jobs. A permanent staff of about 20 men is maintained at present.

After unsuccessfully boring for a drinking water supply the Company is preparing to lay some two to three miles of pipe line to convey a supply from one of the springs near Veddar mountain.

H. M. Ord is manager of the local yard, George Orr, field foreman; H. M. Cook, field engineer; C. A. Yergen, yard foreman; R. E. Brown, head carpenter; H. K. Ingalls, head tractorman; Mrs. Yergen, boarding house manager.

A crew of A. L. M. & D. Co. employees was called out on Sunday to suppress a bush fire which had started near the company's holdings at Poplar.

Mrs. A. H. Harrop has returned from a motor trip to the south.

### AUCTION SALE

Under instruction from ROY BRETT of Chilliwack, B.C. I will sell by public auction on—

WEDNESDAY, AUG 4th, 1926

commencing at 1:30 p.m. sharp at his place on the Prairie Central Road, about 7 miles south-east of the City of Chilliwack his HERD OF DAIRY COWS, 34 Head, including 1 Jersey Bull.

15 head are Jersey Grades, the remainder are Guernsey and Holstein grades. Four are 2 years old, twelve are 3 years old, two are 4 years old, eleven are 5 years old, two are 6 years old and two are 7 years old. 13 head are fresh, or will be about day of sale; 6 were bred in February and March; the remainder are in full milk and bred in May, June and July.

The herd has been home-grown and hand picked are in pink of condition. The herd test for butter-fat runs from 4.2 to 4.6%.

The bull is a mature animal. Don't miss this sale if in need of cows. Shipping by boat or rail.

Terms cash; unless credit arrangements are made with the Owner or the Auctioneer before the sale commences. WM. ATKINSON, Auctioneer Chilliwack, B.C., Tel. 234L2; Box 222

## Ancient and Modern Meet in Rockies.

Upper—Leather spring coach used to travel in Rockies, before the motor car age.

Lower Left—Modern sight-seeing cars of today. Lower Right—Motor car of 1902, used in the Canadian Rockies.

As the evening shadows began to lengthen across the Bow Valley in the Canadian Rockies on the last day of May, a diminutive time-worn, rust-bitten, two cylinder motor car of 1902 vintage chugged through the portals of the Rockies into Banff, there to join the throng of motor cars on Banff Avenue and unwittingly form a historic pageant indicating the developments in motor transportation during twenty-four years.

As it happens at such times, the shades of the past arise to refresh the memories of old-timers and bring forth reminiscences indicating the progress made within recent years. And so with the shades of the past evoked by one of the first "horseless carriages," mingling with its glittering brothers of the modern age.

When it too glittered with newness the mountain valleys knew not the odor of gasoline and the ordered roar of the exhaust, the old-timer onlookers said. No fine pavements such as at present grace the streets of the famous mountain resort, smoothed out the irregularities. The dirt surface of Banff Avenue knew only pedestrian, saddle and pack-ponies, and the iron tired wheels of the lumbering leather spring coach, used as the first sight-seeing vehicle in the Rockies.

In 1916, the Canadian Government opened the park gates to motor travel. In 1925, the motor sight-seeing equipment, used to carry passengers by motor

through the Rockies from the Banff Springs Hotel to the chain of other Canadian Pacific railway hotels and bungalow camps, numbered a hundred modern motor cars and sight seeing busses. In 1926, the system carried 220,000 passengers a total of approximately a million miles in three of Canada's mountain national parks. Thirty-six thousand motor cars, carrying 126,000 holidaymakers, passed through the gates of the Kootenay and Banff National Parks during the same season.

On June 16, the new Lake Louise to Field Highway was opened to the motorist, uniting the three national parks by motor road and increasing the grand total of modern highway in the mountains to approximately 230 miles. But when the diminutive motor vehicle was the latest creation in automobiles, the mileage of roads in the mountains could be counted on the fingers of both hands.

The day following its arrival in Banff, R. Stacey, Kelso, Washington, filled the gas tank of the 1902 car and set out over the Banff-Windermere Highway enroute for home. He is driving the car from Edmonton, Alberta, where it recently won the first prize in the light car class of the old car contest conducted by the Edmonton Journal.

In crossing the two summits on the highway, a modern car was called into action to aid the ancient vehicle over the top. By afternoon it reached Radium Bungalow Camp at the south end of Kootenay National Park, where the owner called it a day after covering ninety miles.

## Facts

### of the Brewing Industry in British Columbia

THE Brewing Industry of British Columbia employs hundreds of men with an annual payroll of about three-quarters of a million dollars, using per annum nearly ten million pounds of malt, made from barley grown in Canada, and over one hundred and fifty thousand pounds of hops produced in British Columbia.

It requires over one hundred thousand dollars for fuel, mined in British Columbia, to produce the beer consumed in this province. Many hundreds of thousands of dollars are paid by the brewers annually for materials such as bottles, cooperage, crownstoppers, labels and bottle wrappers—all of which are manufactured in Canada.

THE taxes paid by the breweries to the Government amount to over eight hundred and seventy thousand dollars per annum, exclusive of income taxes.

THE citizens of this province must recognize the importance of such an industry and help to build it up; payrolls and industries are building cities and are the foundation of prosperity.

THE Amalgamated Breweries of B. C. are manufacturing good beers, fully matured and aged, a product recommended by physicians on account of its nourishing and health-giving qualities; these beers contain only a very low percentage of alcohol and therefore are the proper stimulant needed when exhausted or overworked, as recognized by medical authorities.

THE Vancouver Brewery Limited, Rainier Brewery Co. of Canada Limited, Westminster Brewery Limited, Silver Spring Brewery Limited and the Victoria Phoenix Brewing Co. Limited, members of the Amalgamated Breweries of B. C., are under supervision of the Liquor Control Board, and their beers are analyzed from time to time by expert firms of the continent upon instigation of the Liquor Control Board, which gives ample assurance to the public that they receive only pure and wholesome beers when bought either in the Government Vendor Store or in licensed beer parlors.

This advertisement is not published or displayed by the Liquor Control Board or by the Government of British Columbia.

### SUMAS WELL DOWN 650 FEET

"Stuck" casing caused suspension of drilling at the Sumas oil well, Kennedy farm, Sumas Prairie during the past week. At a depth of 600 feet the casing could not be driven further, and the leverage of three 30-ton jacks was found inadequate to raise and loosen it. More powerful equipment was secured from Vancouver, enabling drilling to be resumed on Tuesday.

The bit has now penetrated a depth of about 650 feet, but is yet in a hard clay stratum. A slight seepage of gas has been noted at the top of the well, but this is thought to emit from the 200-foot level, at which it has been encountered by Mr. Kennedy and the Canadian Oil Co. when drilling for water. The present drilling equipment at the Sumas well has a capacity up to 3,000 feet, so it is claimed. There are two engines and complete equipment with boiler, and the necessary drilling bits, cables and casing sufficient for considerable more drilling.

Several hundred persons have visited the site of operations during the past few months, including many Americans who have taken a practical interest in the work. Local geological formations have been repeatedly pronounced as of oil-bearing promise by noted geologists and the well operators are most hopeful of prospects for either gas or oil.

### GERTRUDE E. A. NINNES

Interment of the remains of Gertrude Elizabeth Amelia Ninnes, 56, who died at Mt. Lebanon last Friday, was made in St. Nicholas cemetery on Tuesday. Service was conducted by Rev. R. E. W. Biddell in St. Matthew's church and attended by a number of friends from Bradner.

### Descendant of Governor

Duke Dmitri, of Leuchtenberg, Count de Beauharnois, lineal descendant of Charles, Marquis de Beauharnois who governed Canada in the name of the French King Louis XV between 1726 and 1747, is visiting for the first time the country in which his ancestor made history. He is joining his cousin the Marquis de Albizzi in a thirty-day tour of the Canadian Rockies and is taking part with him in the grand Pow-Wow held at the Ptarmigan Valley in August. He travelled from Cherbourg on the Canadian Pacific liner Melita and travelled C.P.R. across Canada. Coming down the St. Lawrence he was deeply interested in the province of Quebec with which he is historically connected and passing through Fort William he had another reminder of the days, nearly two hundred years ago when La Verendrye, founded the city under the auspices of the Marquis de Beauharnois. His family still keeps a highly interesting letter written in French and Indian on birch bark addressed to the Marquis thanking him for "the kindly care you have taken of your children", the Iroquois.

### LOCAL SHEEP WIN CHAMPION- SHIPS AT PRAIRIE FAIRS

Archie C. Stewart, the local sheep-breeder, is carrying off most of the blue ribbons at the prairie fairs in which he has exhibited his show sheep. At Lethbridge, his first entry, he took all firsts and championships in South Downs and Shropshires. Among the 25 head he has taken east are eight head owned by W. A. Hawkshaw of Chilliwack, which won prizes as follows at the Lethbridge fair: Hampshires, first prize aged ram; second prize yearling; first prize ram lamb; first prize aged ewe; first and second prizes shearing ewes; first ewe lamb; championship with aged ewe; and first prize Cotswold ram.

Practically the same prizes have also been won at Portage la Prairie, Dauphin, Yorkton and Melford. The local animals are now being shown on the northern Alberta fair circuit, including events at Lacombe, Stettler, Red Deer, Camrose and Vegreville. It is not expected that Mr. Stewart will return in time for Vancouver fair, but he plans his best showing for the Provincial exhibition at New Westminster this year.

Three head owned by Fen Wilson, Mr Stewart's assistant, are also being shown, and have won two first prizes and a championship at Lethbridge.

### Conservatives Name Delegates

A meeting of the local Conservative association was held in the Masonic hall on Tuesday evening and the following appointed as delegates to the forthcoming convention: E. Webster, E. T. Weir, Mrs. A. Taylor, Mrs. Hunt, J. W. McPhee, H. Oldaker, M. M. Shore, W. H. Hudson. Committee rooms are being taken at the rear of Dr. Quinn's office. The convention is set for Thursday of this week in Mission. H. J. Barber will undoubtedly be the unanimous nominee.

Miss Edith MacGillivray, B.A. of Toronto, daughter of Dr. D. MacGillivray of Shanghai, is spending a few days with her uncle and aunt, Rev. and Mrs. Paton before leaving for China next week.

Mr. S. F. White has just recovered from a slight sickness.

Mr. T. McMillan is a patient in the local hospital with a cold.

A Provincial Game Board agent passed through Abbotsford Tuesday making a survey of game conditions in the Fraser Valley.

Messrs Leonard Bick and Gunderson of Kilgord have both purchased Ford touring cars.

Mrs. Green of the Women's Institute at Poplar is preparing the prize list for a flower, vegetable and home products exhibition to be held in the Community Hall.

The first annual dance of Abbotsford Baseball Club is called for Friday August 6. Haywood's Novelty orchestra will play.

## Agricultural Wealth Of The Prairies

In this year when the twin Provinces of Alberta and Saskatchewan will celebrate their coming of age as autonomous units in the Canadian Confederation, it is not only interesting but appropriate to note the truly amazing progress made by Western Canada in a space of time so brief as to be considered but a passing moment in the life of a nation. When the West was first opened to settlement with the advent of the C.P.R., predictions were made that a great future awaited it, and these were renewed when twenty-one years ago the Old North West Territories passed and the Provinces of Saskatchewan and Alberta came into being. But even the most optimistic could hardly foresee such growth as has actually been recorded.

Twenty-one years ago Manitoba had a population of about 300,000, and in creating the two new Provinces they were each credited with an estimated population of 250,000. As a matter of fact the census the following year disclosed a much smaller figure. Compared with less than 700,000 population in the three prairie provinces in 1905, it is confidently predicted that this year's census will show a population of approximately two and one-half millions.

According to a recent estimate by the Dominion Bureau of Statistics, the gross agricultural wealth of Canada in 1925 was \$7,832,942,000, almost one-half of which was credited to Manitoba, Saskatchewan and Alberta. Although the youngest of all the provinces Saskatchewan occupies second place in gross agricultural wealth, being exceeded by Ontario only, while Alberta and Manitoba occupy fourth and fifth places respectively. The gross agricultural wealth of Saskatchewan last year is placed at \$1,826,833,000, Alberta at \$1,092,187,000, and Manitoba at \$696,495,000. These are remarkable figures for such a young country, still in the initial stage of its development.

In annual agricultural revenue the strong position held by Western Canada is even more strikingly indicated. In land values and value of farm buildings the older and more populous provinces of Ontario and Quebec naturally outrank the West, but in the annual value of agricultural production the Western Provinces take a high place. The total agricultural revenue of Canada in 1925 is placed at \$1,708,567,000, of which the three prairie provinces produced \$803,730,000, Saskatchewan being credited with \$416,022,000, or only \$61,000,000 less than Ontario; Alberta with \$245,662,000 and Manitoba \$142,046,000.

In field crops, Saskatchewan comes first with Ontario second, Alberta third and Manitoba fourth. Ontario and Quebec lead in farm animals with Alberta third. In poultry and eggs Ontario and Quebec also lead, with Saskatchewan third. Alberta is fourth in the production of wool, while Manitoba occupies third place in the production of honey. The Western Provinces are out of the running in the production of fruits and vegetables, leadership in these lines belonging to Ontario followed by British Columbia, Quebec and Nova Scotia in the order named.

Considering the fact that the new twin provinces of the West were not quite nine years old when the Great War broke, and the unsettled and difficult years which have since intervened, the progress of the West must be regarded as altogether remarkable. It speaks volumes for the capacity of the country itself and the capabilities and energies of the people, while giving promise of a growth, development and prosperity within the next decade or two unsurpassed in all the past history of the Dominion.

There has been a consistent rise in agricultural revenue since 1921 following the unprecedented high war prices of 1918, 1919 and 1920. Equally gratifying is the definite tendency towards a greater diversity of crops. No longer is it possible to sum up Canadian agricultural revenue under the two headings of field crops and livestock. Dairy products, poultry and eggs, honey, fur farming and other pursuits now represent a respectable sum in the total of the Dominion's annual production of wealth.

One year hence Canadians will celebrate the diamond jubilee of Confederation. The Dominion is moving forward to observance of that anniversary with ever increasing confidence and pride in the country, under conditions of expanding trade, increased development of natural resources, greater industrial activity, marked advances in production along many lines, and particularly in agriculture and allied pursuits, a growing population, and increased financial power and general prosperity.

The Western Provinces are only just beginning to make their contribution to the growth and prosperity of the Dominion. No section of the Dominion will have a greater contribution to make in the years immediately ahead, and not in material things alone will that contribution be made, but in leadership in all things which make a people truly great, in statesmanship, in the arts and sciences, in the world of religion and social service. The record of the past two decades is but the promise of the future.

### Is Considerate Of Police

French President Does Not Keep Gendarmes Up Late

When President Doumergue, of France, is at the presidential summer residence at Rambouillet he declines all invitations which keep him away from the chateau in the evening. "You see," said the president, in explaining why he had to decline an invitation, "when I leave Rambouillet after dark the gendarmes all along my route are called out and are not allowed to go to bed until I am back home again. So I prefer not to go out. It is not I who call them out. It is a far more influential person than the president, and over whom, alas, I have no power. It is the Prefect of Police."

### Stiff Joints

and sore muscles are quickly relieved by a few applications of Minard's.

W. N. U. 1635

### Weather Not Cause Of Colds

Over Fatigue Exposes System to Ever-Present Germs

The time-honored notion that colds are for the most part caused by inclement weather is ridiculed in a bulletin issued by the United States public health service.

Cold in the head, says the bulletin, is unquestionably the consequence of over-fatigue, which exposes the system to the bacilli that float constantly about. The majority of colds are "caught" during the months when little outdoor exercise is taken. It is not cold or damp which causes coryza (the technical word for the ailment), but the substitution of stale air for fresh.—Detroit Free Press.

### Better C.N.R. Earnings

The gross earnings of the Canadian National Railways for the week ended June 7, 1926, were \$5,048,860, as compared with \$4,029,141 over the same week of 1925, an increase of \$1,019,719, or 25 per cent.

Horses in England are decreasing in number at a rate of nearly 70,000 a year.

"So the shark took your leg?"  
"Yes, but I wanted a new one, anyhow, the old one being too short."

### Industrial Research

National Council of Women Advocate Retention of Trained Men and Women

A report prepared by Mrs. Ora Mackay, of Montreal, for the committee on immigration and colonization, was read by Mrs. Charles Thorburn at the National Council of Women conference held at Vancouver. The report pointed out that statistics showed that the universities of British Columbia, Saskatchewan, Alberta, Quebec and Dalhousie alone have contributed a total of 1,108 trained graduates to the United States in less than ten years.

It was resolved that the National Council of Women endorse the proposed legislation as taken from the speech from the throne, regarding the matter of an industrial research organization, and to petition the government to subsidize the said organization for a period of years with the view of retaining the trained technical men and women to build up the nation.

### Swollen Joints, Quickly Limbered Up

### Rub On Nerviline

You would be surprised at the wonderful action of "Nerviline" in just such cases. Being thin and not an oil preparation, it is able to penetrate quickly, and down it sinks into the tissues, carrying its healing, soothing action wherever it goes. For stopping muscular or nerve pain, for easing a stiff joint, Nerviline is a complete success. Pain, soreness, stiffness all vanish before the magic power of this wonderful liniment. Nearly fifty years of success proves the merit of Nerviline, which is sold everywhere in large 35 cent bottles.

### The Decline In Democracy

Representative Government Would Appear To Be In Serious Danger

It is becoming more and more evident that representative government is in very serious danger. It has been destroyed to all intents and purposes in Italy, in Spain, in Russia and in Greece; both in France and Germany its future cannot be regarded entirely confidently; and even in this country and the United States anti-democratic forces have manifestly increased and multiplied since the war.—London Daily News.

Wise and experienced mothers know when their children are troubled with worms and lose no time in applying Miller's Worm Powders, a most effective vermifuge. It is absolute in clearing the system of worms and restoring those healthy conditions without which there can be no comfort for the child, or hope of robust growth. It is a most trustworthy worm exterminator.

### Says Plants Have Brains

Noted Indian Physiologist Has Conducted Many Experiments

Sir Jagadis Chandra Bose, the noted Indian plant physiologist, has perfected a device that, he says, accurately measures the nervous impulses of a plant's fibres. He contends that vegetables feel, react and almost think in the same way as animals, but to a lesser degree. As a result of his experiments, Sir Jagadis asserts, he has become convinced that plants have brains, and that their thought processes can be ascertained.

Time Has Tested It.—Dr. Thomas' Electric Oil has been on the market upwards of fifty years and in that time it has proved a blessing to thousands. It is in high favor throughout Canada and its excellence has carried its fame beyond the seas. If it were double the price it would be a cheap liniment.

### Imports More Cream

The United States doubled importations of Canadian cream and fresh milk during May as compared with the previous month. In the past month, according to a report just issued by the Dominion bureau of statistics, 344,000 gallons of cream, worth \$580,810, were exported to the United States as against 153,909 gallons valued at \$252,810 in April.

### Grafts On Eyes

Sight has been restored or created in certain animals by the grafting of eyes, according to a recent experiment by Prof. E. Guyonot, of the University of Geneva. The subjects were tritons, a species of aquatic salamander. Out of 84 cases, three successes were reported.

### Ceremony Was Delayed

A new viceroy is always sworn in, on his arrival in India, by the Lord Chief Justice of Bombay. When Lord Reading was sworn in an amusing incident occurred. A New Testament only was provided, so that the proceedings had to be adjourned while an Old Testament was fetched.

### Canadian Weekly Newspaper Association

Officers Are Elected at Annual Convention Held in Quebec

The seventh annual convention of the Canadian Weekly Newspaper Association was held recently in Quebec. Officers for the coming year were elected as follows:

President, J. A. MacLaren, of the Examiner, Barrie, Ont.  
First vice-president, W. S. Wynn, of the Enterprise, Yorkton, Sask.;  
second vice-president, S. Ainslow, of the Graphic, Campbellton, N.B.

The following were elected as directors of the association: Hugh Savage, Leader, Duncan, B.C.; R. E. White, Sentinel, Kamloops, B.C.; H. C. McCrae, Herald, Hamilton, Alta.; L. D. Nesbit, Mail, Bassano, Alta.; James McDonald, Courier, Unity, Sask.; S. J. Dornan, Despatch, Alameda, Sask.; D. C. Dunbar, Mercury, Estevan, Sask.

### Boy War Veteran Dies

Youngest Member of Australian Imperial Forces Was Great Sufferer

Forty operations in eight years failed to save the life of Bernard Haynes, wounded war veteran. Because he enlisted in the Australian Imperial force at the age of 14 and thus became the youngest Anzac to go on active service, Haynes became "Baby" to his intimates.

A German shell burst near him at Bapaume in July, 1917, and from that date until his death recently, Haynes was never off his back. For eight years the ablest surgeons in Melbourne bent their energies toward getting him on his feet again. Operations became almost a monthly event with him, and he bore them all with a stoical cheerfulness that won him the love of his nurses and the praise of doctors inured to suffering.

### Has Spent Thirty Years In Exploring

Most of Amundsen's Work Done Around North Pole

In two months' time Amundsen will celebrate his 54th birthday and he can look back on a record of exploration at both ends of the earth, to which he has devoted 30 years of his life, and which has added enormously to our knowledge of the Arctic and Antarctic. Most of his life's work has been done around the North Pole, where 20 years ago he located the Magnetic Pole and found the Northwest Passage. In 1911 he conquered the South Pole, and now he has surveyed hundreds of thousands of square miles of the unknown Arctic, a task accomplished in three days, which, but for the conquest of the air, he was prepared to undertake by drifting with the Polar current in the Fram for as many years.

### Brother Had a Handicap

"Why do you always insist upon having the largest piece of pie, Harry?" asked the mother reprovingly. "Isn't your big brother entitled to it?" "No'm," said Harry; "he was eating pie three years before I was born."

## HAD TO TIE CHILD'S HANDS

Eczema on Head Itched Badly. Cuticura Healed.

"Eczema broke out in pimples on my little girl's head. It itched badly and she scratched causing sore eruptions. Her hair fell out and she was very fretful. We had to tie her hands to keep her from scratching, and she could not sleep. We had her treated but the trouble kept getting worse."

"We began using Cuticura Soap and Ointment and in a short time could see an improvement. We continued the treatment and in less than six weeks she was healed." (Signed) Mrs. A. G. Awcock, 706 Notre Dame Ave., Winnipeg, Man.

Cuticura Talcum is cooling, soothing and comforting to tender, itching, burning feet.  
Sample Each Free by Mail. Address Canadian Agents: "Bathhouse, Ltd., Montreal." Price, Soap 25c, Ointment 25c and 50c, Talcum 50c.  
Bottle Cuticura Shaving Stick 25c.

### Says Water Will Replace Gasoline

Paris Scientist Working On Discovery For Auto Fuel

The town pump is coming back to usefulness. A Paris scientist is working out a discovery which, if it can be applied, promises to revolutionize economic production for the world. According to the professor, it is a mere matter of time and a question of making the necessary calculations in order to catalyze water and build a water-driven internal combustion engine, or to catalyze any other body to transform the forces produced into energy-driven, productive machinery.

"We shall catalyze water," he says, "and you will have automobiles driven by hydrogen engines. That is a mere matter of time to establish plans. As soon as calculations are made to substitute water for gasoline, France will be freed from foreign bondage for her motive power. Preliminary formulae must be established. They will revolutionize modern industry."—Kingston British Whig.

### DELICATE GIRLS NEED NEW BLOOD

Which Can Be Had Through the Use of Dr. Williams' Pink Pills

Nature intended every girl to be happy, active and healthy. Yet too many of them find their lives saddened by suffering—nearly always because their blood is to blame. All those with colorless cheeks, dull skins and lusterless eyes are in this condition because they have not enough red blood in their veins to keep them well and in the charm of health. They suffer from depressing weariness and periodical headaches. Dark lines form under their eyes, their heart palpitates violently after the slightest exertion, and they are often attacked with fainting spells. These are only a few of the miseries of bloodlessness. When the blood becomes thin and watery it can be enriched through the use of Dr. Williams' Pink Pills and the troubles that come from poor blood disappear. In almost every neighborhood you will find some formerly ailing girl who has a good word to say for this medicine. Among them there is Miss Ida M. Withrow, Harwood Lands, N.S., who says:—"Dr. Williams' Pink Pills did more for me than all the other medicine I took, and I cannot praise them too highly. When I began the use of these pills I was in a terribly run down condition, very thin and very pale. My appetite was gone, and I had a tired, worn out feeling all the time. Doctor's medicine did not seem to improve my condition and I was getting greatly discouraged when a friend advised me to give Dr. Williams' Pink Pills a trial. After taking six boxes I felt like a new person. I gained weight, had a good color, and an improved appetite, and the constantly tired feeling that had made me so miserable was gone. I took a few boxes more before I stopped, and by that time I had never felt so well in my life. I shall always feel very grateful to Dr. Williams' Pink Pills and strongly recommend them to those who are run down."

You can get these pills from your druggist or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Oxford Professor Self-Taught

Started Work In Stone Quarry At Age Of Six

In "John o' London's Weekly," Dr. Joseph Wright, M.A., tells the amazing story of his rise from donkey-boy in a Yorkshire quarry to Professor of Comparative Philology (science of language) at the University of Oxford, a position he has just resigned. At six he went to work in the quarry. He taught himself to read and write, and at 20 became a sort of schoolmaster. Later he taught himself Sanskrit, Latin, Greek, French, German, Gothic, Old Bulgarian, Lithuanian, Old Norse, Old Saxon, Old High German, Middle High German, Old Icelandic, Anglo-Saxon and Old English. As a result, at the age of 46 he became an Oxford professor and one of the best-known grammarians in the world.

### Ancients Had Their Sugar

Cultivation of sugar cane is among the extremely old agricultural pursuits, for it is reported that in India, before the Christian Era, soldiers of Alexander the Great brought back the "honey-bearing reed" from the banks of the Indus.—Detroit News.

For Catarrh.—It is one of the chief recommendations of Dr. Thomas' Electric Oil that it can be used internally with as much success as it can outwardly. Sufferers from catarrh will find that the Oil when used according to directions will give prompt relief. Many sufferers from this ailment have found relief in the Oil and have sent testimonials.

A woman always makes up her mind about a thing before she asks a man's advice, and if he happens to agree with her his reputation for wisdom is forever established.

A vegetarian says that his good health is the result of eating no meat and chewing it well.

Minard's Liniment for Burns

Best of all Fly Killers—10c and 25c per packet at all Druggists, Grocers and General Stores.

### World's Poultry Congress

Exchange of Practical Ideas In Poultry Raising

Poultrymen and farm experts from the leading nations of the world will assemble at the World's Poultry Congress to be held at Ottawa, Canada, in the summer of 1927. It is already intimated that at least two thousand five hundred delegates will attend from the United States.

The World's Poultry Congress was organized for the exchange of the most practical ideas in poultry raising. It also, like all world's congresses, affords a means of promoting understanding and good-will among the nations. The congress in Canada next summer will be the first held on this side of the Atlantic, or in any English-speaking country. The first congress was held at The Hague, Holland, in 1921, and the second at Barcelona, Spain, in 1924.

The showing made by Canadian exhibits at the Barcelona Congress was such that Canada was selected as the country of meeting of the third congress. This selection was strongly supported by delegates from both the United States and Great Britain. Ottawa, the capital of Canada, has been chosen as the city in which the congress will be held, and preparations are being made for a gathering on a scale exceeding either of the preceding congresses.

Visitors from the United States will travel by automobile as well as train, there being excellent highways to Ottawa through a country famous for its scenery. American tourists enter Canada without passports or any veritable restrictions.

### To Conquer Frozen North

Arctic Explorers of Seven Countries Plan Convention to Map Out New Expedition

For the first time in history Arctic explorers will meet in convention within the next few months. Their object will be the mapping out of a scientific conquest of the frozen regions of the north. The convention will be held in Cologne, Germany.

The United States, Germany, Russia, Great Britain, Japan, France and a Scandinavian country will be among those represented. Preliminary plans for the meeting include the completion of arrangements for a dirigible expedition to the North Pole.

Soft corns are difficult to eradicate, but Holloway's Corn Remover will draw them out painlessly.

The thing we need most in this life is someone to make us do what we really can do.

A good resolution affords the maker great consolation, even though it lasts only five minutes.

## Cramps and Colic

Summer Complaint or Stomach Pains safely, quickly relieved by Chamberlain's Colic & Diarrhoea Remedy

WESTERN FARMS WANTED BY buyers who will deal with owners only. Do not pay big commission. Werner Schafroth, 127 Davison, Highland Park, Mich.

BAKERS' OVENS—Write for catalogue and list of used ovens. Hubbard Oven Company, 1100 Queen West, Toronto.

**A BROKEN DOWN SYSTEM.**  
This is a condition (or disease) to which doctors give many names, but which few of them really understand. It is simply weakness—a breakdown, as it were, of the vital forces that sustain the system. No matter what may be its cause (it is almost numberless), its symptoms are much the same; the more prominent being sleeplessness, sense of prostration or weakness, depression of spirits and want of energy for all the ordinary affairs of life. Now, what alone is absolutely essential in all such cases is increased vitality—vigour, vital strength and energy to throw off these morbid feelings, and as night succeeds the day this may be more certainly secured by a course of THE NEW FRENCH REMEDY, **THERAPION NO. 3** than by any other known combination. So rarely as it is taken in accordance with the directions accompanying it, will the shattered health be restored. THE EXPIRING LAMP OF LIFE LIGHTED UP AFRESH, and a new existence imparted in place of what had so lately seemed worn-out, used-up and valueless. This wonderful medicine is suitable for all ages, constitutions and conditions, in either sex; and it is difficult to imagine a disease or derangement whose main feature is weakness, that will not be speedily and permanently overcome by this recuperative essence, which is destined to cast into oblivion everything that had preceded it for this wide-spread & numerous class of human ailments. Sold by leading Chemists, druggists, or returned mail from Dr. E. L. LECHE Med. Co., New York 24 N. W. 4th St. London

## Canada Must Not Relax In Offering Inducements To Settlers From British Isles

The report of the British overseas settlement committee for 1925 shows how little Canada can afford to relax its activity if it wishes to fill its vacant spaces with Old Country stock. Whether it is recognized or not, there is considerable rivalry for these settlers. This country has to contend with the charms and the shillings of Australia, and, so far, does not appear to be getting the better of the bargain, says the Toronto Globe.

Last year out of 43,057 persons who left Britain under the overseas settlement scheme, 11,442 came to Canada. Australia got 23,427 and New Zealand 8,051, while 115 went to South Africa. So, if there is a disposition to believe that Canada can sit back in composure and await the arrival of a new population, even with the advantages and assistance offered, it should not be continued.

Australia is not overlooking any opportunity to get settlers from the British Isles. It is extending just as interesting inducements as this country, and is alert in following them up. Notwithstanding the new rates put into effect to this country—\$3 to eastern ports and \$9 to British Columbia—our friendly rivals on the other side of the world are ready to meet us. They have recently undertaken to raise loans to the amount of £34,000,000, to be apportioned among the various states of the Commonwealth to assist in settlement. This is expected to provide for the admission of 450,000 immigrants, including 34,000 families, within the next five years. And Australia has considerable to offer new arrivals when they reach her shores.

This bidding for immigrants is of decided advantage to those seeking new lands to conquer. Unassisted migration is falling off. It is evident that the country which shows the greatest energy and offers the greatest aid is going to get the people; and there is some chafing in the Old Land over the restrictions imposed—so much, in fact, that it will be a subject of consideration at the next Imperial Conference.

With this existing competition the whole question of immigration promises to take on added importance. Canada will have to be alive to her interests, but at the same time cannot afford to let down the bars to all who wish to come, or to go beyond the limits of reason in extending assistance. The country needs people, but the kind who will help themselves when given an opportunity.

### The Red-Backed Cutworm

Summerfallow Method of Control Is Recommended

The red-backed cutworm, which feeds upon a wide range of food plants, is the most widely distributed and generally destructive cutworm in Canada. It is a constant hazard to crops in the prairie provinces, and is the most important kind of cutworm in Manitoba and Saskatchewan. In view of these facts the Dominion department of agriculture has issued a new bulletin on the red-back cutworm and its control in the prairie provinces. It is pointed out in the bulletin that fully half of the damage caused by cutworms to field crops and ninety per cent. of that to garden crops can easily be prevented if the proper means of control are adopted. No spring-sown crops immune to cutworm injury are known, but fall rye is recommended as a resistant crop. In the bulletin, which may be obtained from the Publications Branch of the Department at Ottawa, the value of poisoned bait, even in fields, is emphasized, and a summerfallowing method of control is also recommended. This consists in cultivating frequently during spring and summer to bring weeds under control. Plough deeply in midsummer, using a section of harrow behind the plough, but otherwise leaving the surface as rough as is permissible, with due regard to moisture and conservation. Allow the land to crust and remain unworked until after the first week in September; then cultivate to destroy the weeds. The essential point is to have the fallow crusted the period of flight of the moths, from about July 20 to September 5, in order to make the lands unsuitable for egg-laying.

### Hint For Beekeepers

Decelving bees with a new type of honeycomb adds greatly to the profits of beekeepers, according to the inventor of the device. By lessening the time needed to manufacture comb, it is said to enable the bees to double the output of honey. Aluminum combs are painted with beeswax.

Time seldom adds to the value of pictures painted by Hope.

W. N. U. 1625

### Control of Plant Lice or Aphids

Easily Procured Insecticide Will Rid Plants of This Pest

Sometimes these insects are called green flies. They are among our most common and destructive insects since they attack a great variety of plants, including cabbages, cauliflowers, sweet peas, currant bushes, box elder trees, etc. Aphids are soft-bodied insects which have biting and chewing mouth parts, and which actually eat pieces out of the leaves, plant lice feed only upon the juices of the plants. A poison placed upon the surface of the leaf has no effect upon aphids, since they get their food from below the surface. Fortunately, plant lice have soft bodies, so a contact insecticide can be applied. One of the best to use is "Black Leaf 40," a tobacco preparation which should be procurable everywhere in both city and country. Directions for diluting the material come printed upon the container. Apply the spray upon the under sides of the leaves as that is where the plant lice usually feed. It is very important to apply the spray so that it will forcibly hit every insect as only those actually hit by the spray will be killed. To increase the efficiency of this insecticide add about two pounds of ordinary laundry soap to every 40 gallons of spray material. The soap acts as a spreader and sticker.

Send specimens of injurious insects to the Department of Entomology, Manitoba Agricultural College, Winnipeg, for identification. Insect inquiries should be accompanied with specimens if at all possible. Methods of control will be sent by return mail.

### Has Improved Poultry Flocks

Gratifying Results Obtained From Culling System in Saskatchewan

A substantial improvement in the poultry flocks of the province of Saskatchewan is noted by Mr. J. G. Rayner, director of extension in the college of agriculture in making report of the poultry culling activities of the department during the season of 1925-26. The figures show that out of a total of 29,498 birds handled by the inspectors, 8,624 were culled, whereas in the season of 1924-25, out of a total of 35,425 birds handled, 9,376 were culled, and the percentage of culls to the total was reduced from 26.5 in 1924-25 to 21.8 in 1925-26.

"The department undertakes to cull flocks of standard bred poultry only," states Mr. Rayner, "and the total handled while over 4,000 more than in the previous year, is still 2,000 more than have ever been handled in any previous year. This is the seventh season that this culling work has been undertaken, and the percentage of culls is lower this year than formerly, which must indicate that the flocks in general are improving as a result of the culling work."

### U. S. Farmers Bought Seed

Growing Demand Is Shown For Canadian Registered Seed

"Farmers in the mid-Western States of the United States bought up practically all the available registered Canadian alfalfa seed last season, paying a considerable premium over the home grown seed, plus a duty of four cents a pound."

This statement from Peter Stewart, secretary of the Canadian Seed Growers' Association, is given in a recent report showing the increase in business being done by the association. Mr. Stewart says there is a growing demand from many lands for samples and quotations for Canadian registered seed which seems to point to possibilities for a flourishing export trade within the near future.

Recently the association shipped a big consignment of Canadian pedigreed Marquis wheat and Banner oats to the Argentine Republic.

### Nurse Got Her Instructions

A student nurse, inexperienced in reading the clinical thermometer, was horrified when, taking the temperature of a patient, that instrument apparently registered 120. She hurriedly dispatched a note to the doctor, reading, "Please come at once. Mr. Jones' temperature is 120." The doctor did not come, but he sent this message, "You had better send for the fire engine. I can do no good."—The Argonaut, San Francisco.

### A Six-Story Garage

Stockholm, Sweden, is to have a six-story garage with a capacity of 600 cars, and as the intersecting streets are on different levels there will be direct drive into each story from the connecting streets.

### Protein Test For Wheat

Plea Made For Grading of Wheat According to Protein Content  
During a discussion of estimates in the House of Commons, John Millar, Progressive, Qu'Appelle, made a plea for the grading of wheat according to protein content rather than by the present standards by which it is measured. He thought the National Council of Scientific Research might do a great service if it investigated this possibility.

He believed that at present the Canada Grain Act did not define fully the virtues by which a really hard wheat should be measured.

Mr. Millar, at some length, gave instances in which the grade of grain had been lowered through a slight bleaching, and the lower prices obtained, while the protein content remained the same. He did not suggest that the protein test be the only factor in the grading of wheat, but it should be one factor. The protein test, in a very large measure, indicated the value of the higher grades.

Stanley Tobin (Liberal, Wetaskiwin), supported the suggestions made by Mr. Millar.

Hon. J. A. Robb, minister of finance, said it would no doubt be a desirable thing to bring about.

He was not at all sure that wheat producers in Canada might get at the outset any premium for extra protein wheat. However, he was informed that the National Council of Research had arranged that a sub-committee of that body should consult with the board of grain commissioners on the question of a wider system of protein test in wheat.

### Survey of Mineral Possibilities

Saskatchewan Government to Carry on Extensive Investigations This Summer

The Saskatchewan Government will make a complete survey of the mineral possibilities in that province this summer. Investigation of coal deposits and other mineral resources in Lac La Ronge will be made this month by a party in charge of C. B. Hastings, mining engineer and geologist. He will follow up the preliminary survey made by the provincial ceramist, who found indications of the existence of high-grade coal in the neighborhood of Lac La Ronge. On his recent return from that survey Professor Worcester reported finding outcroppings of coal over an area of about 100 miles long. Oil shales and glass sand were also reported in the Lac La Ronge area.

At the same time another party will go north to Cold Lake, travelling across the Meadow Lake and back to Big River, in company with Professor Worcester.

Two tons of imitation pearls were used in Culver City, Cal., to fashion costumes for movie actresses in a huge "pearl ballet" dance.

### The Cattle Industry

Western Progressive Advocates Putting Cattle On the Free List

The real way to assist the cattle industry of Western Canada is to get the United States to remove the duty or reduce it, G. C. Coote, Progressive member, Macleod, Alberta, told the House of Commons committee on agriculture. Mr. Coote said that the logical market for certain classes of Canadian cattle was in the United States, and that the closing of the market had been a serious blow to the industry in Western Canada. He favored putting cattle on the free list, but if that was regarded as impossible at present, he advocated making the Canadian tariff exactly the same as that of the United States with the definite provision that when that country made a reduction, Canada would follow suit. Canada was not afraid of competition from the American cattle, he said.

Colonel H. A. Mullins, Conservative, Marquette, opposed any more which would admit United States cattle to Canada. He feared that they would bring disease and infect the Canadian herds. The best market for Canadian cattle was in Great Britain, he said.

Hon. S. F. Tolmie, Conservative, Victoria, expressed the opinion that the United States would keep the tariff against Canadian cattle as long as it considered it in their interests to do so.

Mr. Coote stressed the importance of appointing a Canadian trade commissioner at Washington who would be in a position to look after the interests of Canada when legislation affecting this country came before congress.

### Eggs Used In Tanneries

Special Mixture Valuable In First Process of Leather Making

Eggs that are worthless so far as food value goes, are not wasted by the large dealers, but are covered with kerosene after being broken, treated with boric acid and sold to tanneries for use in one of the first processes of making leather. The shells are removed by sieves and the egg mixture is placed in a revolving drum with the raw hides to make them pliant.—New York World.

### Strange Things Happen

Hon. Mr. Robb declared to the Oshawa delegation: "The government will stick to its guns." Now comes the announcement that, because of changes made in the tariff since the Oshawa protest to Ottawa, the General Motors plant is to be enlarged. Coupling these two statements together, we'd say that Mr. Robb knew the kind of powder to use in those guns.—Exchange.

If there is honor among thieves there should be some among politicians.

## Results Of Another World War Would Be To Shatter Foundations Of Civilization

### Poultry Industry Is

Aid To Population

Also Helps to Build Up More Prosperous Race

"The poultry industry will help to stem the tide of population from the country to the city and often across the border," declared Edward Brown, F.L.S., of London, England, speaking before the Provincial Poultry Association at the Veterinary College in Montreal.

Prof. Brown, who is president of the International Association of Instructors in Poultry Husbandry, is making a tour of Canada in the interests of the World Poultry Convention, to be held at Ottawa in the summer of 1927.

"The poultry industry will help us to build up a better and more prosperous race," he asserted, and showed it would provide a great deal of profitable employment, especially in Canada where opportunities are endless.

Several thousand delegates representing nearly all civilized countries, are expected to attend the congress, which is the third of its kind. The first took place in The Hague in 1923, the second at Valencia, Spain, in 1924.

R. J. C. Stead, director of publicity in the immigration and colonization department, stated that the benefits of the congress by no means were confined to poultry interests. The great number of visitors, particularly from Europe, would see in Canada a land where democracy and peace reign, and not a single defensive measure was necessary to keep harmony. It would also show them two great races with different languages—French and English—living together in like harmony.

### Sheep Farming Favored

Desirable Form of Agriculture For Southeast Section of Alberta

Abandoned farms in the southeast of Alberta are being picked up cheaply by farmers, and it is reported that a favorable eye is being turned on sheep as the most desirable form of agriculture for the district. There is plenty of range for the small bands now in that country, and the chief concern of the flock owners is to raise enough winter feed for them. Corn appears to be one of the best crops in that direction. Many are planting sweet clover with their grain crops also, planning on pasturing this, or using it for hay next year.

Transferring wheat directly into dough without a milling process has been accomplished in France.

Poverty keeps off more cases of gout than all the physicians cure.

## New Clan Donald Settler Shows Initiative

One of the many interesting features

of the recent general strike in England was the achievement of the Shorter family, natives of Birmingham, who arrived recently in Canada on the Canadian Pacific liner Metagama. Mr. Shorter had made arrangements to sail from Glasgow, but owing to the strike he was unable to get a train and there were only ten

short hours in which to get the boat.

The head of the family, having sold his effects in the Old Country, possessed a certain amount of cash. He bought a motorcycle with a side car, bundled his wife and two kiddies, baggage and dolls and all, into the vehicle, and made the 300-mile trip to Glasgow in eight hours. This left the thrifty Mr. Shorter two hours in

which to dispose of the motorcycle,

and he did so at a comfortable profit. Commenting on Shorter's accomplishment, Father R. A. MacDonnell, who brought the party out on the Metagama, said it showed a spirit of initiative which would stand the family in good stead in their new venture in Canada. Insert shows Father MacDonnell, pioneer of the Clan Donald settlement scheme in Alberta.

Sometimes it seems as though the great tragedy of the Great War had sunk below the threshold of the consciousness of our public men, says the New York Times. Petty fears, hesitations, formulas, resentments, difficulties have over-laid the memory of what happened to Europe and the world after Aug. 1, 1914. Since then such criticisms and cautions, and anticipated difficulties with regard to the future may be, they shrink to their proper proportions when scaled against the possibilities of another world conflict.

In the war the European belligerents lost 8,500,000 in killed and wounded, to say nothing of the vast array of crippled and diseased. The United States spent two and a half times as much as on all of its previous wars. In nineteen months of actual hostilities we disbursed the equivalent of 84 per cent. of the total expenditures of the United States Government from 1791 to 1916. The money cost to Europe was, of course, far heavier. The total has been placed by the federal reserve board at 200 billion dollars. Experts have reduced this amount to pre-war or gold values, of which 10 billions would fall to our share. What does the loss of 70 billions mean to the nations of Europe? It is equivalent to the entire national wealth of Great Britain at the outbreak of the war, to something less than the joint national wealth of France and Italy. For all the European belligerents the war burned up approximately one-quarter of the aggregate national wealth.

What another world war would mean, nobody can foretell. There is the certainty of more deadly instruments of destruction than were employed in the last war. The nations have developed additional lethal poison gases. Experiments are conducted with disease-bearing bombs. There are submarines already in existence with a cruising radius of 16,000 miles, tanks that travel twenty miles an hour, super-cannons and aeroplanes. Intensified submarine blockades against the food of an entire nation, aerial bombardments on a grand scale taking no account of civilian populations, heavy guns throwing shells for a distance of 100 miles—it is plain that no one can foretell, in terms of arithmetic, what the casualties of another world conflict would be.

It is among the high probabilities that the political and social order of Europe, overthrown in Russia by the late war, badly shaken over the rest of the continent, would not survive another catastrophe. The present order will go and in its place will assert themselves the doctrines of Lenin. The peoples of Europe, overtaken by another calamity like that of 1914, will not stop to balance the costs of war against the costs of communism. Rage and despair will send the peoples of Europe into the Bolshevik abyss. What that would mean we may conjecture from what it has meant in Russia. There the Communist experiment has cost more lives, in a single country, than the total of 8,500,000 dead for all the belligerents in the World War. National wealth in present-day Russia it is impossible to estimate. But not unfriendly observers have reported that the Russian people's standard of living is one-half lower than before the war. What the results of a similar experiment in the industrialized nations of Western Europe would be cannot be estimated, but can be summarized. Mr. Keynes speaks of Western Europe, under communism, going down into the pit of death.

### Round up Of Wild Horses

Now Staging What May Be Last Event Of This Kind in the West

What may be the last wild horse roundup is now in progress in the stretch of territory between Medicine Hat and Standard, and between the Bow and Red Deer Rivers. The animals that are caught are checked over. Those that are useful are kept, those that are not are destroyed. The bands of wild horses have increased in the last few years until they have become a nuisance to the ranchers.

### For Tuberculosis Research Work

Hon. J. A. Robb, minister of finance, announced when a vote of \$15,000 for the National Research Council was being considered, that the council was undertaking work in the field of tuberculosis together with the federal department of health. For this purpose the amount of the vote was increased to \$15,000.

Safety matches made in Sweden and shipped to America last year weighed 37,002 tons.

**Students Tour in China and Japan**

Indicating the great attraction which "the Immemorial East" exercises on the Occident, here are a group of happy student boys who are determined to see for themselves what everyone at some time or other talks about and discusses. They are photographed on board the Canadian Pacific liner Empress of Russia and sailed recently on that ship for the Orient from Vancouver for a six weeks' tour of China and Japan under the auspices of the Arts and Crafts Guild. In that time they will see many of the famous shrines and cities of the two countries and will come back with a wealth of new ideas reinforced by actual experience of the two greatest examples of the East. They will return to Canada on the Empress of Russia arriving at Vancouver August 8.

**G. N. R. RIGHT-OF-WAY EAST OF KILGARD SOLD TO FARMERS**

W. J. Hillebrand of the Great Northern Railway company is in the district disposing of bridge timbers and right-of-way lands available by abandonment of the several miles of track east of Kilgard to the pumping station. An average price of about \$30 an acre is being set upon the land and timber upon it, and the adjoining farmers are taking full advantage of the bargains. Although the trestle timbers are heavy, they make substantial materials for sheds, foundations, and barns.

**Elks Prepare for Children's Day**

The fourth annual children's day and flag observation of the Aldergrove Elks is to be held at Aldergrove on August 4, and all arrangements are practically completed. Under Ray Ross, chairman of the transportation committee, a number of Abbotsford Brother Bills will attend to transportation of kiddies from this end of the district. A program of sports will be held during the forenoon, and sweets, ice cream and novelties will be distributed to the children in the afternoon. A big dance will complete the celebration.

**Local Scenery Features in Picture**

Movie fans will have the opportunity of viewing local scenery on the silver screen in the picture "Winds of Chance" which is booked at the Abbotsford theatre for Friday and Saturday of this week. This picture is practically completely made in B.C. Most of the scenes are laid along the Fraser River at Harrison Mills, Chilliwack, Hope, Boston Bar, Capilano Canyon & Bellingham. A number of Vancouver people were included in the cast.

**SYNOPSIS OF LAND ACT AMENDMENTS**

**PRE-EMPTIONS**

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 8,000 board feet per acre west of the Coast Range and 6,000 feet per acre east of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

**PURCHASE**

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price for first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

**HOMESITE LEASES**

Unsurveyed areas, not exceeding 30 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

**LEASES**

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

**GRAZING**

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partly free, permits are available for settlers, campers and travellers, up to 100 head.
